

COMPLETE CABLING EQUIPMENT (PTY) LTD

TREFOIL CLAMPS

Trefoil clamps are used to hold 3 types of cable or conductor together on shelves, ocean beds in trenches or where the application is required. Clamps can be fixed with a single internal (500 series) or double external (300 Series) arrangement. Trefoil clamps are cast and manufactured from bicon aluminium alloy.

We cover cable ranges with outside diameters ranging from 24 mm outside diameter to 76 mm outside diameter. Trefoil clamps are not carried in stock. A standard lead time of 4-6 weeks is applicable subject to final configuration, quantities and prior sales.
